This package includes the Enhanced Pearson eText and the loose-leaf version.

Here are practical, realistic curricular adaptations for ensuring successful inclusion of students with special needs. This highly readable, well researched, and current resource uses a developmental focus, rather than a disability orientation, to discuss typical and atypical child development and curricular adaptations, and encourage the treatment of students as children first, without regard to their learning differences. This integrated but non-categorical approach assumes that children are more alike than different in their development, and avoids the negative impact of labeling children with disability categorical names. The inclusive focus assumes that attitudes, environments, and intervention strategies can be accepted so that all young children with special needs can be included. Combining systematic instruction with naturalistic instruction embedded in daily activities, *Adapting Early Childhood Curricula for Children with Special Needs, 9/e* provides numerous how-to strategies derived from evidence-based practices, making it invaluable as a text today and a resource to take into the classroom tomorrow. Future professionals get examples of practical, realistic curricular adaptations that make inclusive education successful; see how to deal effectively with families and others by developing essential skills in listening, communication, conflict resolution problem solving, and biases and prejudices. Unique to this text is a section including practical recommendations for working effectively with paraprofessionals. Comprehensive without being overwhelming, the book encourages reflective practice. The Enhanced Pearson eText features embedded video and internet resources.

Improve mastery and retention with the Enhanced Pearson eText*

The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is:

- **Engaging.** The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience.
- **Convenient.** Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad® and Android® tablet.*
- **Affordable.** Experience the advantages of the Enhanced Pearson eText along with all the benefits of print for 40% to 50% less than a print bound book.

** The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads.*

**The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7" or 10" tablet, or iPad iOS 5.0 or later.*

FOREWORD For over three decades, this text, *Adapting Early Childhood Curricula for Children with Special Needs*, has served as a major resource for early educators, related services personnel, and faculty members who teach them. Its tremendous success lies in its blend of developmental and learning theories, with practical suggestions for delivery of services to young children with special needs and their families. While today's children with special needs are enrolled in the full range of early childhood education programs, many of these programs have limited exposure to strategies for modifying Early Childhood Education provides children to learn with diversity. Children develop healthy social interaction by mixing with other kids from different cultures and backgrounds. Thus, early learning gives them positivity, self-esteem, and self-confidence. Importance of Early Childhood Education. We all know that learning begins from our very first cry, from the moment of our birth. And the early years of a child are the most important years for their physical and internal development. Now, let's list some importance of ECE. 1. Neurological Developments. Early childhood is a critical time for Adapting early childhood curricula for children with special needs. Item Preview. Identify children with developmental needs and work out interventions that engender involvement within the problem area. 8. The action points cover a wide range of interventions. At least three times a year, children are screened, with a five point scale for each of the dimensions. For children falling below level 4, teachers proceed with further observations and analyses (Laevers, 1997). As an extension of the POMS, the levels of development are assessed in 8 domains with a 5-point scale: gross and fine motor development, representation through language, representation through visual arts, understanding the physical world, social competence, mathematical and logical thinking, self-organisation. A child has special educational needs if they have a learning problem or disability that make it more difficult for them to learn than most children their age. They may have problems with schoolwork, communication or behaviour. Parents can get help and advice from specialists, teachers and voluntary organisations. How schools can help children with special educational needs. A school can usually provide help and sometimes uses specialists. If your child has special educational needs, they may need extra help: with schoolwork. Your child's early years are a very important time for their physical, emotional, intellectual and social development. When the health visitor or doctor makes a routine check, they might suggest that there could be a problem.

@inproceedings{Cook1987AdaptingEC, title={Adapting Early Childhood Curricula for Children with Special Needs (9th edition)}, author={R. E. Cook and M. D. Klein and D. Chen}, year={1987} }. R. E. Cook, M. D. Klein, D. Chen. Published 1987.Â Chapter 1 Providing for Special Needs in Early Education: The Challenge Chapter 2 In Partnership With Families Chapter 3 Recognizing Special Needs and Monitoring Progress Chapter 4 Developing Individualized Intervention Plans and Programs Chapter 5 Implementing Intervention and Instructional Strategies Chapter 6 Promoting Emotional and Social Development Chapter 7 Helping Young Children Develop Motor and Self-Help Skills Chapter 8 Nurturing Communication Skills. All children, including children with special educational needs, have a right to an education which is appropriate to their needs. The aims of education for pupils with special educational needs are the same as apply to all children. Education should be about enabling all children, in line with their abilities, to live full and independent lives so that they can contribute to their communities, cooperate with other people and continue to learn throughout their lives.Â 8 National Council for Special Education Children with Special Educational Needs. What is a Special Educational Need? Understanding special educational needs. The eighth edition of Adapting Early Childhood Curricula for Children with Special Needs, continues to combine systematic instruction with naturalistic instruction embedded in daily life. This text is extremely practical and full of specific instructions derived from evidence-based practices.Â Dr. Chen has extensive experience serving with families and their children with sensory impairments and multiple disabilities as an early interventionist, teacher, program administrator, teacher trainer, and researcher. She has directed projects of significance, model demonstration, outreach, research-to-practice, and personnel development projects funded by the U.S. Department of Education.
