Description:

From Library Journal The shadow in Jungian psychology is the unconscious dumping ground for undesirable characteristics of personality. "Owning" the shadow--accepting it as part of one's self--is seen as the first step toward wholeness. Using examples from history, mythology, and religion, Johnson, author of *Inner Work* (LJ 7/86) and *Transformation* (LJ 8/91), offers a tour of the shadow, showing its origin and features, and demonstrating how and why it bursts into consciousness when least expected. Returning to the subject of his earlier work *We* (LJ 2/1/84), the author reveals how

experience of romantic love may lead to awareness of both positive and negative aspects of the shadow, and how integrating the shadow into one's personality can be a challenging religious experience. This clearly written, thought-provoking work is recommended for academic and public libraries.

"Owning Your Own Shadow" by Robert A. Johnson is a work in which the author lays out the Jungian theory of the shadow and brings new clarity to this subject. The persona is the image that the individual wants to present to the world. The persona is largely based on the material that is stored in the ego. The ego absorbs data that is positive and nurturing for the individual.Â Conflicts naturally develop between the ego and the shadow when the dark side growths in strength just from the sheer size of the data stored. Civilization has taught man to ignore his dark thoughts and view them as evil and sinful or work of the devil. However, this so-called darkness is part of us and denying it does not make it go away. It ultimately must be dealt with. Description. Owning Your Own Shadow Understanding the Dark Side of the Psyche. Robert A. Johnson. View more Comments. Report "Owning Your Own Shadow".
