Preface The American Academy of Pediatrics (AAP) Red Book® Atlas of Pediatric Infectious Diseases, 4th Edition, is a summary of key disease information from the AAP Red Book®: 2018–2021 Report of the Committee on Infectious Diseases. It is intended to be a study guide for students, residents, and practicing physicians. The images of common and unusual features of children with infectious diseases can provide diagnostic clues not found in the print version of Red Book. The juxtaposition of these images against text summarizing the clinical manifestations, epidemiology, diagnostic methods, and treatment. The fast-developing field of infectious diseases requires regular reevaluation, and timely updates of both the AAP Red Book and this companion atlas. There is simply no other book like it in the field, and it is invaluable to pediatric practitioners." Madan Kumar, D.O. University of Chicago Pritzker School of Medicine Doody's Book Review™. About the Author. Carol J. Baker, MD, FAAP, is executive director of the Center for Vaccine Awareness and Research at Texas Children's Hospital and professor of pediatrics and of molecular virology and microbiology at Baylor College of Medicine in Every effort is made to keep Red Book® Atlas of Pediatric Infectious Diseases consistent with the most recent advice and information available from the American Academy of Pediatrics.
