Description:

Professional Nursing Practice: Concepts and Perspectives, Seventh Edition, is intended as a text for registered nurses who are in transition or bridge programs to achieve a baccalaureate or higher degree in nursing. It may also be used in generic nursing programs or in transition or bridge programs for vocational nurses (LPNs or LVNs) to complete the professional nursing baccalaureate degree.

Professional Nursing Practice helps nursing students explore and understand the nurse's role in the health care environment with coverage on topics including nursing history, theory, ethics, and law, as well as nursing roles, issues, and changes in the profession. Fully updated, this edition includes more information on Quality and Safety Education for Nurses (QSEN), global health, and nursing theory and research. This resource explores the changing health care system especially related to health care economics, nursing in a culture of violence, and nursing in a culturally and spiritually diverse world.

Kathleen Blais received her Diploma in nursing from Temple University Hospital School of Nursing (Philadelphia, Pennsylvania), her BSN and MEd from Florida International University (Miami, Florida), MSN from the University of Miami (Miami, Florida), and Ed.D. from Florida Atlantic University (Boca Raton, Florida). She has taught in both undergraduate and graduate nursing programs. Dr. Blais has held faculty and academic leadership positions throughout her career. She is currently a Professor Emerita of Nursing at Florida International University College of Nursing and Health Sciences. Professional values of nursing students may be changed considerably by curricula. This highlights the importance of the integration of professional values into nursing students' curricula. Students' perspectives on professional values influence their approach to applying professional values in their future profession [14, 15, 19, 20]. Nursing educators need additional awareness of nursing students' perspectives on importance of professional values as a basis to use more effective methods for applying professional values. Leners et al. reported that maintaining competency in area of practice, accepting responsibility and accountability for own practice, and safeguarding patients' right to privacy were values prioritized by students. Nursing, as a profession, is committed to recognizing its own unparalleled body of knowledge vital to nursing practice—nursing science. To distinguish this foundation of knowledge, nurses need to identify, develop, and understand concepts and theories in line with nursing. As a science, nursing is based on the theory of what nursing is, what nurses do, and why. Nursing is a unique discipline and is separate from medicine.
