Author’s profile: Cathryn Sill, a former elementary school teacher, is the author of the acclaimed *About ...* series and the *About Habitats ...* series.

Author’s residence: Franklin, NC

Illustrator’s profile: John Sill is a prize-winning and widely published wildlife artist who illustrated the *About ...* series and the *About Habitats ...* series and illustrated and coauthored the *Field Guides* and *Beyond Birdwatching*. A native of North Carolina, he holds a B.S. in Wildlife Biology from North Carolina State University.

Illustrator’s residence: Franklin, NC

Illustrator’s website: www.johnsill.com

Sales handle: This acclaimed series explores the major attributes of the deserts biome and showcases its striking beauty and remarkable diversity using examples from around the globe.

Book description: In the first book in the acclaimed *About Habitats...* series, educator and author Cathryn Sill uses simple, easy-to-understand language to teach children what deserts are and what kinds of animals and plants live there. John Sill’s beautifully detailed paintings reflect the diversity of deserts, from the vast dunes of the Arabian Desert to the rocky Chihuahuan Desert in the southwestern U. S. An afterword provides details on deserts and about the flora and fauna featured in the illustrations.

Advertising / Promotion / Publicity:

Selling Points:

- ACCLAIMED SERIES: 325,000 copies of the *About...* and *About Habitats* books sold
- CLEAR, INFORMATIVE TEXT aimed at younger readers
- HIGH INTEREST SUBJECT: Deserts are fascinating habitats that occur worldwide.
- ADDITIONAL FACTS included in educational afterword
- PERFECT FOR YOUNG NATURE LOVERS: Author is a veteran kindergarten teacher
- STUNNING ARTWORK: Realistic watercolors from an award-winning nature illustrator.

Awards and honors:

- 2008 Bank Street College of Education Best Children’s Books of the Year
- Honor Book, 2007 Society of School Librarians International Book Awards

Reviews:

- “A great choice for beginning readers and for sharing aloud, this elegant blend of clearly presented facts and starkly beautiful paintings makes an informative introduction to a harsh environment and the adaptations made by the plants and animals that live there.” —*School Library Journal*
- “...handsome...well composed, delicately colored, and sensitively lit...accessible to very young children as well as older students, this provides an appealing introduction to deserts.” —*Booklist*

Looking to learn more about the American desert habitat? Improve your knowledge with these desert facts for kids and find out about habitats with DK Find Out. Deserts are the world's driest places. Some are hot while others are bitterly cold. Some may get no rain at all for many years, making them almost lifeless. The deserts found in Mexico and the southwest USA are not as dry as others, and can support more life.

About Habitats book. Read 8 reviews from the world's largest community for readers. In simple, easy-to-understand language, this title offers young readers... Start by marking "About Habitats: Deserts (About...)" as Want to Read: Want to Read saving... Want to Read. The desert habitat is home to a variety of animals that have adapted to survive in harsh, dry conditions. Some of the most iconic desert animals have obvious physical characteristics that have enabled them to adapt to their environment. Coyotes will eat just about anything and are known for being able to quickly adapt their diet to the available resources in their environment. The legendary roadrunner is quick on its feet and is a predator to the venomous rattlesnake. Desert Habitats. Deserts: Outline Map Printout An outline map of world deserts to print. Deserts cover about one fifth (20 percent) of the earth's land area. The desert is a harsh environment with very little rainfall and extreme temperatures; a desert is defined as a region that gets less than ten inches of precipitation per year. Because of these dry conditions, there is limited plant and animal life in deserts. Desert plants (like cacti) are not abundant; neither is animal life. Desert, any large, extremely dry area of land with sparse vegetation. It is one of Earth's major types of ecosystems, supporting a community of plants and animals specially adapted to the harsh environment. In deserts, trees are usually absent, and shrubs or herbaceous plants provide only very incomplete ground cover. Station Leader, 1996 Australian National Antarctic Research Expedition to Macquarie Island, Australian Last Updated: Nov 16, 2020 See Article History. Start studying Habitats: Deserts and Rainforests. Learn vocabulary, terms and more with flashcards, games and other study tools. Rainforests AND Deserts. Both are HABITATS; both provide protection, food and shelter! Differences bw Rainforests and Deserts. Amount of precipitation, climate, plants & animals. Precipitation.
