

An Australian ABC of Animals

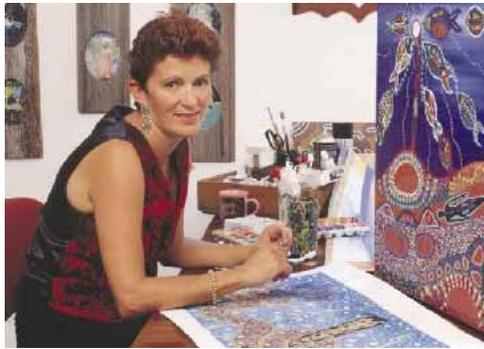

Bronwyn Bancroft

Summary

An Australian ABC of Animals is a delightful picture book, which can be used to introduce Aboriginal Perspectives to young children. It works on several levels, being both an introduction to the alphabet, and a unique exploration of Australian wildlife—some familiar, others more unusual—as seen through the eyes of an indigenous artist. The book will appeal to young children who are fascinated by the animal world around them. It is also a valuable book for older students examining Aboriginal art. Bancroft's

detailed artwork on each page is a perfect starting point for exploring colours and styles used by indigenous artists.

About the author/illustrator

Bronwyn Bancroft is an artist and designer whose artworks have been collected and shown by galleries throughout Australia and around the world.

A descendant of the Bundjalung people, Bronwyn grew up in the small country town of Tenterfield in northern NSW. After studying at the Canberra School of Art, she

became involved in fashion and design, eventually starting Designer Aboriginals, training Aboriginal women in arts and craft. Bronwyn was one of the founders of Boomalli, the Aboriginal Artists' Cooperative, was a board member of the Council of the National Gallery of Australia, has been Chair of the Visual Arts and Crafts Committee for the NSW Ministry of the Arts, and is a well-known speaker on Aboriginal art and advocacy issues. Since 1993 Bronwyn has illustrated several award-winning children's books, including *Fat and Juicy Place* (by Diana Kidd), *Big Rain Coming* (by Katrina Germein), and Oodgeroo's *Stradbroke Dreamtime*.

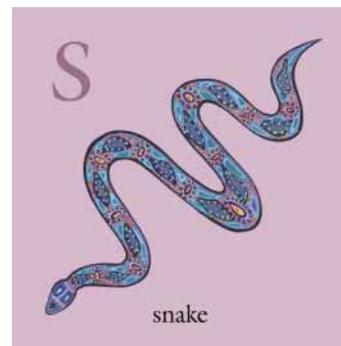

Bronwyn lives in Sydney with her children Jack, Ella and Ruby Rose.

Bronwyn Bancroft on *An Australian ABC of Animals*

“The paintings in this book are a personal journey inside myself, an exploration in line and colour. My artwork is not traditional, but when you are an Aboriginal artist, you're not ‘just’ an artist—you're a teacher, a facilitator, an activist. So although I live and work in the city now, I know that my artistic talent descends from my Old People—they have gifted it to me—and I feel very honoured by that.”

Learning Activities

- Explore each page and discuss the animals represented. Research unfamiliar animals such as the quoll and perhaps the yabby. Where do these animals live? In what kind of habitat are they found? List interesting features about each animal.
- Brainstorm other known native animals to create a personal Australian Animal Alphabet Book for the classroom.
- Create graphic alphabet flashcards by inviting children to draw or paint animals similar to Bronwyn Bancroft's. Learn the alphabet using these flashcards.
- Make masks of various animals based on Bancroft's illustrations (such as kangaroo, owl, dingo, mouse and possum). Using these masks, create a simple play to present.
- Traditionally, indigenous people were very resourceful. They took from the land in order to survive but never depleted their resources. Which of the animals from the book do you think were a source of food or perhaps clothing (pelts) for Aborigines?
- Investigate Bancroft's style of painting. Look at the patterns and colours used. Identify various shapes and lines in each painting.
- Experiment with Bancroft's style of painting using dots and lines. Supply children with animal templates and invite them to draw lines and shapes within the templates, to create an x-ray effect. Fill in the spaces with dots.
- Choose an animal and either (i) model a descriptive piece of writing, or (ii) research to jointly construct an information report. Invite children to illustrate their published writing.
- Examine Bancroft's illustration for the letter S. Introduce children to the story of the Rainbow Serpent. Does the snake in the book resemble the Rainbow Serpent? Invite children to paint their own Rainbow Serpent.

An Australian 123 of Animals is a beautifully illustrated first numbers book by well-known Aboriginal artist Bronwyn Bancroft. A great way to introduce numbers and explore Australian wildlife! Buy from amazon (us/UK). Australian animals are unique. Sing, clap and count to the rhyme of "Over in the Meadow" and learn about wallabies, koalas, wombats, and more. Buy from amazon (UK/USA). Buy from booktopia (aus). Diary of a wombat. A wombat's work is never done! Take a trip with a wombat, and discover the ins and outs of her day in this modern classic Australian picture book. There are holes to be dug and territory to be defended and don't forget all the eating and sleeping that needs to be squeezed in too! Buy from amazon (us/UK). Australia hosts an array of incredibly unique environments with a wide range of biodiversity. Learn about the incredible animals that can be found in Australia. The origin of these dog-like animals has been a subject of debate for a while, with some sources indicating that they migrated from central Asia about 18,000 years ago. The dingo has a lean, hardy body with the head as the widest part of the body. It is agile and has highly flexible joints, making it easy to rotate its neck 180 degrees. Dingos can be found in the wild in Australia, especially on Fraser Island. 9. Sugar glider. The sugar glider is a species of gliding possum that has striking similarities to the flying squirrel, the most prominent being its ability to glide through the air. Australian Animals The Unique Animals Of Australia. Some Australian animals are extremely unique and special but when you grow up here you don't realise that, of course. Growing up in the outback around Tibooburra New South Wales we saw a lot of them but we didn't really see anything special about them. To us they were just something we saw every day. Since mankind's existence in Australia a lot of different animals have been introduced and are now roaming around feral animals like the Camel, the Rabbit and the hideous Cane Toad. The first introduced animal was the Dingo which has been here for thousands of years. The European settlers deliberately released many different animals into the Australian native bush.
