

Research **Methods** **for** **Architecture**

Ray Lucas

Laurence King Publishing

Contents

- 6 Introduction: What is architectural research?**
- 10 The etic and the emic
- 11 Depth and focus as a variable
- 11 Context: methodology, theory**
- 14 Thesis: antithesis: synthesis
- 15 Architectural History (not history of architecture)
- 15 Architectural Social Sciences (not social science of architecture)
- 16 Architectural Philosophy (not philosophy of architecture)
- 17 The structure of the book

- 24 PART 1: FUNDAMENTALS OF ARCHITECTURAL RESEARCH**

- 24 Chapter 1: Defining your research question**
- 25 What do you want to find out?
- 29 Defining your terms
- 29 Framing a research question
- 31 Exercises for developing a research question

- 36 Chapter 2: Defining your research methodology**
- 36 How can you find something out?
- 37 Conventional research methodologies.
- 43 Validating your approach
- 45 Reflective practitioners and practice-based research

- 46 Chapter 3: Building your literature review**
- 48 Establishing your field
- 48 Finding relevant works
- 51 Archival research
- 53 Evaluating sources
- 56 How to review a text

- 58 Chapter 4: Cross-disciplinary working**
- 59 Defining your discipline
- 61 Identifying cross-disciplinary texts or partners
- 64 Finding common ground and a common language
- 64 Practicalities of cross-disciplinary work
- 66 Collaboration: frameworks and practicalities**

- 68 Chapter 5: Conducting and documenting fieldwork**
- 70 What is the field?
- 73 Preparing for fieldwork
- 74 Documentation: field notes and sketchbooks
- 75 Recording media: photography, video, audio
- 78 Analyzing your fieldwork

- 80 Chapter 6: Conducting interviews and communication**
- 81 Who should you interview?
- 83 Types of interview

87	Recording and transcription	164	Chapter 13:
88	Analyzing your interviews		Ethnographic research
		164	Conducting ethnographic research
90	Chapter 7:	166	Writing culture
	Writing up	168	Using ethnographic research by others
91	Knowing your audience	169	Case Study: Ethnographies of creative practice – experiment or ethnography?
94	Your duty to the reader: structuring your writing		
102	PART 2:	175	Chapter 14:
	PRACTICAL APPLICATIONS		Drawing, diagrams and maps
	AND CASE STUDIES	176	A practice native to architecture
		177	The sketchbook as a storeroom for ideas
		178	Case Study: 'Getting Lost in Tokyo'
102	Chapter 8:	184	Chapter 15:
	Material culture		Conclusion: Theory and practice
103	The commodity status of things	192	Glossary
108	Entanglements of people and things	194	Endnotes
109	Stuff as cultural indicator	201	Bibliography
HI	Case Study: The cart at assemblage	204	Index
114	Chapter 9:	208	Acknowledgments
	Environmental psychology		
114	James Gibson and alternative approaches to space		
115	People-environment studies		
116	Case Study: 'InflectingSpace'		
125	Chapter 10:		
	Architectural histories		
126	Historiography of architecture: historians and their histories		
133	Case Study: The architectural manifesto		
140	Chapter 11:		
	The politics of space		
142	Politics and the language of architecture		
145	The right to the city		
146	Society of the spectacle		
149	Case Study: 'Cultures of Legibility'		
152	Chapter 12:		
	Philosophy, phenomenology and the experience of space		
153	Applications of philosophy to architecture		
154	Linguistic analogies in architecture		
157	Dwelling and being-in-space		
160	Case study: Sensory notation		

Review of Ray Lucas, *Research Methods for Architecture* (Laurence King, 2016). Renewed interest in integrating research into design is apparent when we look at books published on the topic in recent years. The go-to textbook for more than a decade, Linda Groat and David Wang's *Architectural Research Methods* was revised and expanded in a recent second edition (2013), reflecting such interest. The most important area of update is on the relationship between design and research. In particular, it explores research by design, that is, generating new knowledge using design as a method, as do a number of Architecture Research Office and Della Valle Bernheimer are winners of the design competition *From the Ground Up: Innovative Green Homes*. The ArchDaily *Architectural Models*. *Baroque Architecture* Cultural Architecture Sacred Architecture Education Architecture Residential Architecture Architectural Columns Architectural Features Gian Lorenzo Bernini Baroque Art. *The Story of Baroque Architecture*. Focusing on the Baroque period, this book gives readers the tools they need to grasp the architectural language and building forms of this style. Part of a new, accessibly written, and *Research Methods for Architecture* Paperback " February 16, 2016. by. Raymond Lucas (Author). Visit Amazon's Raymond Lucas Page. Find all the books, read about the author, and more. See search results for this author. Are you an author? Learn about Author Central. Raymond Lucas is a Senior Lecturer at Manchester School of Architecture. His interests include ongoing research into the field of anthropology and its applicability to architecture. His work has been published in numerous academic journals. Product details.

Printed in China. Research. Methods. for. Architecture. The research context can be many things, of course: the career of a particular architect, a historical period, an established typology, a piece of architecture or a city. "Context" is used to describe what the subject of research is, how it is located (where the idea of "location" has an open meaning) and what its boundaries are. Research Methods: The Basics is an accessible, user-friendly introduction to the different aspects of research theory, methods and practice. Structured in two parts, the first covering the nature of knowledge and the reasons for research, and the second the specific methods used to carry out effective research, this book covers: x structuring and planning a research project x the ethical issues involved in research x different types of data and how they are measured x collecting and analysing data in order to draw sound conclusions x devising a research proposal and writing up the research. Nicholas Walliman is Senior Lecturer in the Department of Architecture at Oxford Brookes University, UK. The Basics. Acting bella merlin. Research methodologies in architecture, anna university, chennai M.arch. ethics Methods of data collection " From primary sources " observation and recording, interviews, structured and unstructured, questionnaire, open ended and close ended questions and the advantages, sampling " Problems encountered in collecting data from secondary sources. UNIT IV REPORT WRITING " Research writing in general " Components: referencing " writing the bibliography " Developing the outline " presentation. Architectural Research Methods. New York: John Wiley and Sons, 2002. Reviewed by Kerry London and Michael Ostwald. In 2002, Linda Groat and David Wang published a text on research methods specifically aimed at architectural scholars and practitioners. With the growth in pressure on academic staff in. with a particular interest in architecture and mathematics. Ultimately Groat and Wang's. Architectural Research Methods.
