Learn how to grow your garden using hydroponics.Â Your Introduction to Hydroponics. When most people think of gardening, soil comes to mind. But plants donâ€™t actually require it to survive. They mostly need the nutrients and minerals in the soil. Plants can grow in water, gravel, perlite, rice hulls, pine bark, cedar shavings, and other mediums, or even suspended in air. The science of soilless gardening is called hydroponics. It may sound like something devised in a modern laboratory, but itâ€™s been around for thousands of years. The essential ingredient is an oxygenated mineral-nutrient solution thatâ€™s circulated through plantsâ€™ roots.
