Description:

For courses in maternal-child nursing, care of women and children, and women's health, for both 4-year BSN-level courses and selected ADN-level (2-year) programs

A humanistic, holistic approach to thinking like a nurse

Olds' Maternal-Newborn Nursing & Women's Health: Across the Lifespan is a family-focused text that covers maternal-newborn nursing and women's health topics with special attention to evidence-based practice, cultural competence, critical thinking, professionalism, patient education, and home/community care. Relatable and engaging, the text is built upon the philosophy that pregnancy and birth are normal life processes, and that family members are partners in care. The holistic approach helps readers develop their clinical-reasoning skills, and prepare to practice nursing in an ever-changing healthcare environment.

Also available with MyNursingLab®

This title is also available with **MyNursingLab**—an online homework, tutorial, and assessment program designed to engage students in the Maternal/Newborn Nursing course and improve results. Its guided learning path is proven to help students think like a nurse as they move beyond memorization to true understanding through application.

NOTE: You are purchasing a standalone product; MyNursingLab does not come packaged with this content. If you would like to purchase both the physical text and MyNursingLab, search the Pearson website. MyNursingLab should only be purchased when required by an instructor. Students, if interested in purchasing this title with MyNursingLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

Presentation transcript: 1 Olds's Maternal-Newborn Nursing & Women's Health Across the Lifespan, Ninth Edition Michele Davidson Marcia London Patricia Ladewig CONCEPTION AND BIOPHYSICAL CHANGES. 2 Olds's Maternal-Newborn Nursing & Women's Health Across the Lifespan, Ninth Edition Michele Davidson Marcia London Patricia Ladewig OOGENESIS Ovary gives rise to oogonial cells First meiotic division Davidson/London/Ladewig, Olds' Maternal-Newborn Nursing and Women's Health Across the Lifespan 9th Edition Test Bank Chapter 13. STUDY. Flashcards. The nurse in the obstetrical clinic is setting appointments for patients seeking preconceptual care. Which patient should be seen first? 1. 36-year-old, has never been pregnant, takes medication for a seizure disorder. 2. 15-year-old, smokes one pack per day, had a miscarriage 4 months ago. 3. 22-year-old, runs long distances, has been on the pill for 6 years. 4. 29-year-old, has had two abortions, takes a multiple-vitamin supplement. A humanistic approach to maternal-newborn care and women's health. Olds's Maternal-Newborn Nursing & Women's Health Across the Lifespan acknowledges the central role of nurses in all aspects of childbearing. Relatable and engaging, it promotes holistic, evidence-based care grounded in patient-family partnerships, while supporting the clinical reasoning skills nurses need to care for patients in an ever-changing health care system. The 11th edition includes a new Reproductive Genetics chapter and a new Case Study feature, plus access to Pearson's MAP app with nursing strategies for education
