

The Diversity and Inclusion Handbook

by Sondra Thiederman

Handbook Review by Gary Tomlinson

“A diverse and inclusive workforce is one of the most critical advantages and hidden secrets of today’s truly effective leaders and organizations. **Diversity** and **inclusion** are concepts that have evolved from responsible business objectives and employee engagement goals to become the essential ingredients for individual and organizational success today and in the future.”

“The foundation of any successful inclusion and diversity effort lies in the ability of each leader and each team member to communicate respect for people different from him or herself.” Sondra Thiederman has written a straightforward, simple to understand handbook that can be easily applied and one that will make an immediate change in both the person and the workplace. She believes that; “diversity is not an imposition, it’s an advantage; Inclusions is not a problem, it’s a solution; Working together is more than a good idea, it’s essential to individual and organizational success.”

Gary Tomlinson (reviewer) recently had the opportunity to interview the author, Dr. Sondra Thiederman.

Reviewer: What would be one or two key messages you’d like the reader to take away from *The Diversity and Inclusion Handbook*?

Sondra Thiederman: The biggest message I want readers to take away is that it’s imperative in our workplace today that we value the differences around us. Those differences might be gender, it might be age, it might be nationality or it might be different sets of abilities. But at the exact same time I believe we also need to focus on the common ground we all share. Every human being, regardless of their differences, shares a great deal more with one another than we realize. I believe there’s been a misconception in the workplace that says if we focus on what we have in common we are by definition devaluing the ways in which we differ. And that is wrong. That simple isn’t true. It’s very possible for us to value diversity, to value differences while simultaneously looking at identifying the common ground we all share. The two can live side by side.

Reviewer: What would you say to a CEO, or any manager for that matter, about the importance of this subject that goes beyond just the fact that it’s the right thing to do?

Sondra Thiederman: That’s a great question and one I’m glad you asked. There’ve been countless studies that firmly establish the fact that the more we value the differences between

each other and the more we identify the common ground we share in our work teams, the more productive and the more innovative we're going to be. An inclusive workgroup, project team or organization is one in which people of all backgrounds comfortably work together toward a common purpose. These unified teams have been proven to be more successful because the individuals on those teams trust each other and are more willing to share information and ideas. They have a sense of shared responsibility, a desire to collaborate and a preoccupation with solutions to achieve their goals. We need to value more of the ways we are different and more of the ways we are alike because that's what makes a team more productive and more innovative.

The Diversity and Inclusion Handbook is a WALK THE TALK[®] Publication. U.S. Department of Education John B. King, Jr. v Institutional Commitment to Promoting Student Body Diversity and Inclusion on Campus: Research shows that colleges and universities seeking to promote campus diversity identify how diversity relates to their core institutional mission and the unique circumstances of the institution. For example, mission statements and strategic plans that promote student body diversity and inclusion on campus establish priorities that can, in turn, lead institutions to allocate the necessary funds and resources for those purposes. Diversity and inclusion is a company's mission, strategies, and practices to support a diverse workplace and leverage the effects of diversity to achieve a competitive business advantage. Companies that create diverse and inclusive work environments are more adaptable, creative, and become magnets that attract top talent. Diversity and inclusion priorities. A survey by Forbes Insights of more than 300 senior executives " 32% who were in HR or talent management " found their companies' diversity and inclusion priorities include: Assigning a top executive the responsibility for leading and sponsoring the diversity and inclusion program. Creating behavioral standards and holding leaders accountable for results. Training people at all levels on topics like unconscious bias. Diversity and Inclusion Management. attitudes and behaviors towards the job and organization. According to Robinson's chapter identifies the various strategies required to manage the diversified workforce. and analyses its impact on the employee engagement and organizations performance. Diversity and inclusion management. The subject of diversity management has gained much attention with globalization. and recognized its need to satisfy and serve the stakeholders globally. The terminology relating to inclusion and diversity is complex and contested and there are differences in interpretation and meaning both within and between countries. For the sake of simplicity the following terminology has been used: "Inclusion" is used to refer to processes of recognising the rights and needs of minority groups within mainstream schools, in this case with special reference to cultural, linguistic and religious minorities.
