CHAPTER 1 ■ BIOSTATISTICS 13

**Physician reimbursement**

- The primary care physician is reimbursed for the physician. Payer: A fiscal intercessor to pay for physician services.
- **Outpatient:** A physician is paid a fixed amount for each patient, usually on a monthly basis, or a fee-for-service or retainer model. Payer: Physician may refer to health plan or to the health insurance.
- **Salary:** Hospital or DSO pay a fixed salary to the physician regardless of procedure performed, or a fixed number of visits made by the physician. Payer: Physician may refer to health insurance.
- **Capitated:** A physician is paid a fixed amount for the patient. Payer: Physician has a fixed fee for the patient, or a fixed fee for the patient, and a fixed fee for the patient.
- **Global Retainer Care:** Contract for physician who help patients in an emergency when the physician is not meeting compensation for the patient's care.

**REVIEW QUESTIONS**

1. During a long-haul flight, a pilot's stress level follows a normal distribution with a mean of 100 and a standard deviation of 15. During the flight, the pilot's stress level is 140. How many standard deviations above the mean is the pilot's stress level? (100 is the mean and 15 is the standard deviation.)

2. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is greater than 115?

3. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115?

4. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is greater than 85?

5. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is less than 115?

6. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is between 85 and 115?

7. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is between 85 and 115, and the value is greater than 85?

8. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is between 85 and 115, and the value is less than 115?

9. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is between 85 and 115, and the value is between 85 and 115?

10. A normal distribution has a mean of 100 and a standard deviation of 15. What is the probability that a randomly selected value is between 85 and 115, given that the value is between 85 and 115, and the value is between 85 and 115?
