

Indian Institute of Technology Gandhinagar LIBRARY

New Addition of Books Vol. 9 No. 25, 2016

(Added during 11th July – 15th July, 2016)

Available for issue from 23th July, 2016

Where are these books?

The new arrivals section (books) is available in front of Library entrance gate

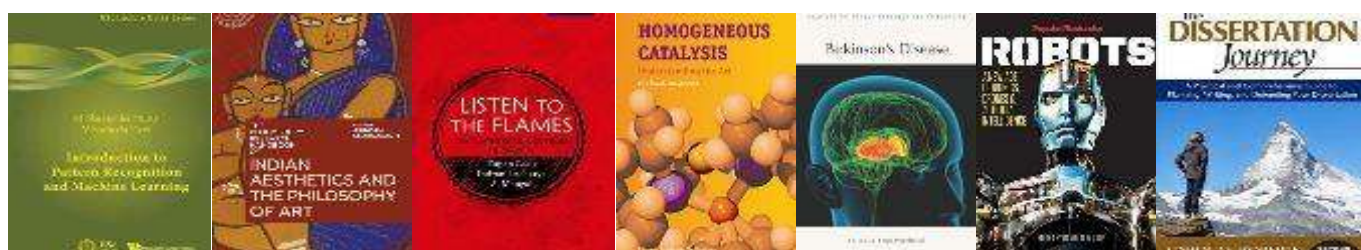

How to reserve these books?

Reserve the books through the Email or fill up the reservation slips that are available at the Circulation Desk

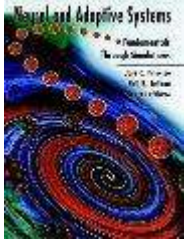

How to suggest the book?

You can suggest the book through the Email or using “book indent form” which is available on the website.

Computer Science

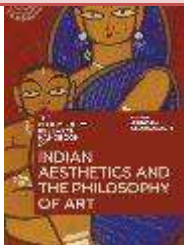

Title: [Neural and adaptive systems: fundamentals through simulations](#)
Author: Principe, Jose C.
Publisher: New York: Wiley, 2000
Call No.: 006.32 PRI
Acc. No.: 023684

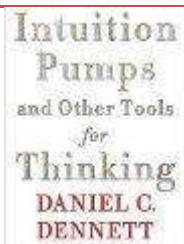

Title: [Introduction to pattern recognition and machine learning](#)
Author: Murty, M. Narasimha
Publisher: New Jersey: World Scientific, 2015
Call No.: 006.4 MUR
Acc. No.: 023689

Philosophy

Title: [Bloomsbury research handbook of Indian aesthetics and the philosophy of art](#)
Author: Chakrabarti, Arindam
Publisher: New York: Bloomsbury, 2016
Call No.: 111.850954 CHA
Acc. No.: 023681

Title: [Intuition pumps and other tools for thinking](#)
Author: Dennett, Daniel C.
Publisher: New York: W.W. Norton & Company, 2013
Call No.: 121.6 DEN
Acc. No.: 023679

Sociology

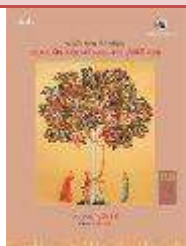

Title: [Listen to the flames: texts and readings from the margin](#)
Author: Basu, Tapan
Publisher: New Delhi: Oxford University Press, 2016
Call No.: 301.3654 BAS
Acc. No.: 023672

Education

Title: [Improving schools in difficulty](#)
Author: Clarke, Paul
Publisher: London: Continuum, 2005
Call No.: 371.207 CLA
Acc. No.: 023680

Language

Title: [Bharatiya Bhasha Lok Sarvekshan : Gujarat, Diu-Daman ane Dadra Nagar Havelini Bhasha, Vol. 9, Part 3](#)

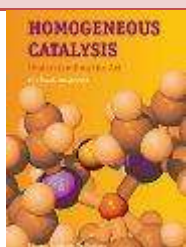

Author: Devy, Ganesh

Publisher: Chennai: Orient BlackSwan, 2016

Call No.: 427.954 DEV

Acc. No.: 023677

Chemistry

Title: [Homogeneous catalysis: understanding the art](#)

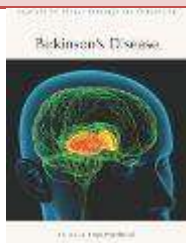

Author: Leeuwen, Piet W.N.M. Van

Publisher: Boston: Kluwer Academic Publishers, 2004

Call No.: 541.395 LEE

Acc. No.: 023688

Medicine & health

Title: [Parkinson's disease](#)

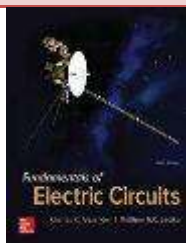

Author: Przedborski, Serge

Publisher: New York: Cold Spring Harbor Laboratory Press, 2012

Call No.: 616.833 PRZ

Acc. No.: 023687

Engineering

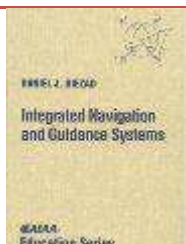

Title: [Fundamentals of electric circuits](#)

Author: Alexander, Charles

Publisher: New York: McGraw-hill Education, 2017

Call No.: 621.31924 ALE

Acc. No.: 023678

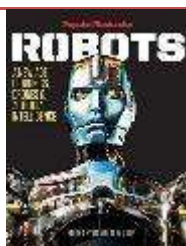

Title: [Integrated navigation and guidance systems](#)

Author: Biezad, D.

Publisher: Reston: American Institute of Aeronautics and Astronautics, 1999

Call No.: 629.13251 BIE

Acc. No.: 023683

Title: [Popular mechanics robots: a new age of bionics, drones and artificial intelligence](#)

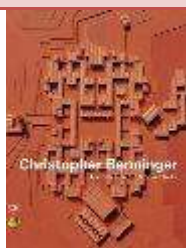

Author: Wilson, Daniel H.

Publisher: New York: Hearst Books, 2015

Call No.: 629.892 WIL

Acc. No.: 023682

Architecture

Title: [Christopher Benninger: architecture for modern India](#)

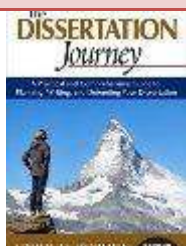

Author: Falvo, Rosa Maria

Publisher: Balewadi: India House Art Gallery, 2015

Call No.: 724.6 FAV

Acc. No.: 023685

Literature

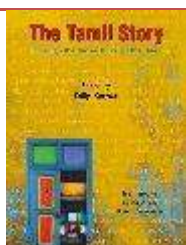

Title: [Dissertation journey: a practical and comprehensive guide to planning writing and defending your dissertation](#)

Author: Roberts, Carol M.

Publisher: California: Corwin, 2010

Call No.: 808.066378 ROB

Acc. No.: 023686

Title: [Tamil story: through the times, through the tides](#)

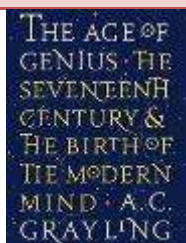

Author: Kumar, Dilip

Publisher: New Delhi: Tranquebar Press, 2016

Call No.: 894.811301080914 KUM

Acc. No.: 023673

History

Title: [Age of genius: the seventeenth century and the birth of the modern mind](#)

Author: Grayling, A.C.

Publisher: New Delhi: Bloomsbury Publishing, 2016

Call No.: 940.252 GRA

Acc. No.: 023674

Title: [Al-Hind, the making of the Indo-Islamic world. Vol. 1 : Early medieval India and the expansion of Islam, 7th-11th centuries](#)

Author: Wink, Andre

Publisher: Boston: Brill Academic, 1996

Call No.: 954.02 WIN

Acc. No.: 023675

Title: [Al-Hind, the making of the Indo-Islamic world. Vol. 2 : slave kings and the Islamic conquest, 11th-13th centuries](#)

Author: Wink, Andre

Publisher: Boston: Brill Academic, 1997

Call No.: 954.02 WIN

Acc. No.: 023676

The text is suitable for senior/graduate courses in neural networks and adaptive filters. It offers over 200 fully functional simulations (with instructions) to demonstrate and reinforce key concepts and help the reader develop an intuition about the behavior of adaptive systems with real data. This creates a powerful self-learning environment highly suitable for the professional audience. It offers over 200 fully functional simulations (with instructions) to demonstrate and reinforce key concepts and help the reader develop an intuition about the behavior of adaptive systems with real data. This creates a powerful self-learning environment highly suitable for the professional audience. Neural and Adaptive Systems: Fundamentals Through Simulation. © Jose C. Principe Neil R. Euliano W. Curt Lefebvre. by. Copyright 1997 Principe. The goal of this chapter is to introduce the concepts of Hebbian learning and its multiple applications. We will show that the rule is unstable but through normalization is very useful. neurons are equivalent to PEs, and PEs are connected through weights. Hence, Hebb's principle will increase the common weight w_{ij} when there is activity flowing from the j th PE to the i th PE. If we denote the output to the i th PE by y_i and the activation of the j th PE by x_j , then, $\hat{w}_{ij} = \hat{\eta} x_j y_i$. Equation 1. where $\hat{\eta}$ is our already known step size which controls what percentage of the product is effectively used to change the weight. Main IEEE Transactions on Neural Networks Neural and Adaptive Systems: Fundamentals Through Simulations. IEEE Transactions on Neural Networks 2001 / 05 Vol. 12; Iss. 3. Neural and Adaptive Systems: Fundamentals Through Simulations. Chen, K., Kvasnicka, V., Kanen, P.C., Haykin, S. Volume The simulations are based on NeuroSolutions, a versatile neural network simulator developed by Neuro-Dimension, and which is included in the CD-ROM accompanying the book. The book covers a total of 11 chapters, and three appendixes. According to this reviewer, the chapters may be grouped as follows: Chapters 1 and 2 are introductory, covering basic concepts dealing with the use of linear models for data fitting and the pattern-recognition problem.

The text is suitable for senior/graduate courses in neural networks and adaptive filters. It offers over 200 fully functional simulations (with instructions) to demonstrate and reinforce key concepts and help the reader develop an intuition about the behavior of adaptive systems with real data. This creates a powerful self-learning environment highly suitable for the professional audience. It offers over 200 fully functional simulations (with instructions) to demonstrate and reinforce key concepts and help the reader develop an intuition about the behavior of adaptive systems with real data. This creates a powerful self-learning environment highly suitable for the professional audience. It begins by explaining the fundamentals of adaptive linear regression and builds on these concepts to explore pattern classification, function approximation, feature extraction, and time-series modeling/prediction. The text is integrated with the industry standard neural network/adaptive system simulator NeuroSolutions. This allows the authors to demonstrate and reinforce key concepts using over 200 interactive examples. * Over 200 fully functional simulations of adaptive systems are included. * The text and CD offer a unified view of neural networks, adaptive filters, pattern recognition, and support vector machines. * Hyperlinks allow instant access to keyword definitions, bibliographic references, equations, and advanced discussions of concepts. The interactive book "Neural and Adaptive Systems: Fundamentals Through Simulations (ISBN: 0471351679)" by Principe, Euliano, and Lefebvre, has been published by John Wiley and Sons and is available for purchase directly through Amazon.com. Our enthusiasm for this book is best expressed by the response of our readers. The book contains over 200 interactive experiments in NeuroSolutions to elucidate the fundamentals of neural networks and adaptive systems. The inclusion of interactive experiments in the book allows for the presentation of key concepts without the use of complex equations. The lead author of the book is Dr. Jose Principe, director of the Computational NeuroEngineering Laboratory at the University of Florida. Neural and Adaptive Systems book.
