

Mountain Gorillas: Biology, Conservation, and Coexistence

By Gene Eckhart, Annette Lanjouw

Johns Hopkins University Press. Hardback. Book Condition: new. BRAND NEW, Mountain Gorillas: Biology, Conservation, and Coexistence, Gene Eckhart, Annette Lanjouw, Tucked into one of the most beautiful and conflicted regions of the world are the last of the mountain gorillas. These apes have survived centuries of human encroachment into their habitat and range and decades of intense conflict and violence. The remaining 720 mountain gorillas exist in a fragile habitat, nestled in an area torn by human interests and needs for land, water, and minerals. With captivating photography and the most recent scientific research, Mountain Gorillas takes you deep into the montane rain forests of Uganda, Rwanda, and the Democratic Republic of Congo to reveal the complex story of the mountain gorillas of the Virunga Volcanos and Bwindi. Gene Eckhart and Annette Lanjouw reveal how humankind affects the gorillas and their habitat, detail the innovative conservation and education efforts undertaken by governments and nongovernmental organizations, and explain how ecotourism and other conservation-focused enterprises support efforts to protect the two mountain gorilla populations. This perfect blend of intimate photography, thought-provoking scholarship, and engaging stories demonstrates the inexorable ties among the animals, environment, and peoples of the region, and makes clear why...

Mountain gorilla: Conservation efforts appear to be paying off for large, charismatic animals. "These conservation successes are proof that the ambitious, collaborative efforts of governments, business and civil society could turn back the tide of species loss," she said. Almost 100,000 plants and animals have now been evaluated for extinction threats by the IUCN. Of these, around a quarter are on the edge of extinction. The "winners" in the new Red List include: The mountain gorilla. There were around 600 mountain gorillas left in the wild in 2008; but numbers have now risen to over 1,000 after intensive conservation efforts.
