Islamic philosophy is a development in philosophy that is characterised by coming from an Islamic tradition. Two terms traditionally used in the Islamic world are sometimes translated as philosophyâ€”falsafa (literally: "philosophy"), which refers to philosophy as well as logic, mathematics, and physics; and Kalam (literally "speech"), which refers to a rationalist form of Islamic theology. Philosophy, Islamic. Publisher. Malden, MA : Polity Press. Collection. inlibrary; printdisabled; oliverwendellholmeslibrary; phillipsacademy; americana. Digitizing sponsor. Kahle/Austin Foundation. A brief introduction to the meaning of Islam, the notion of God in Islam, and His basic message to humanity through the Prophets. This website is for people of various faiths who seek to understand Islam and Muslims. It contains a lot of brief, yet informative articles about different aspects of Islam. New articles are added every week. Also, it features Live Help through chat.Â From the Islamic standpoint, believing in the Oneness of God means to realize that all prayer and worship should be exclusively for God, and that He alone deserves such titles as â€œLordâ€ and â€œSaviourâ€. Some religions, even though they believe in â€œOne Godâ€, do not make all of their worship and prayers for Him alone.
