Organic Chemistry Laboratory Techniques. Item Preview. remove-circle. The target audience are undergraduate students in organic chemistry. In this resource you will find theory and procedures on the main organic lab techniques (chromatography, crystallization, extraction, distillation) as well as general concepts on how to set up and heat apparatuses (see the Table of Contents tab for a more complete listing of topics). All procedures are accompanied by step-by-step pictures, and graphics are heavily utilized throughout the resource. Chapter 1: General Techniques. 5.301 Chemistry Laboratory Techniques. Prepared by Katherine J. Franz and Kevin M. Shea with the assistance of Professors Rick L. Danheiser and Timothy M. Swager. Revised by J. Haseltine, Kevin M. Shea, Sarah A. Tabacco, Kimberly L. Berkowski, Anne M. Rachupka and John J. Dolhun. IAP 2013. This course is an intensive introduction to the techniques of experimental chemistry and gives first year students an opportunity to learn and master the basic chemistry lab techniques for carrying out experiments. Students who successfully complete the course and obtain a "Competent Chemist" (CC) or "Expert Experimentalist" (EE) rating are guaranteed to secure opportunities for research work in a chemistry lab at MIT.
