## Description:

Despite being excited by and interested in the grain markets, many participants crave a better understanding of them. Now there is a book to deliver that understanding in ways that could help you make money trading grain. Elaine Kub uses her talents for rigorous analysis and clear, approachable communication to offer this 360-degree look at all aspects of grain trading. From the seasonal patterns of modern grain production, to grain futures' utility as an investment asset, to the basis trading practices of the grain industry's most successful companies, Mastering The Grain Markets unveils something for everyone. The key to profitable grain trading, Kub argues, is building knowledge about the fundamental practices of the industry. To demonstrate the paramount importance of such intelligence, she uses anecdotes, clear examples, and

her own experiences as a futures broker, market analyst, grain merchandiser, and farmer. The result is an immensely readable book that belongs in the hands of every investor, grain trader, farmer, merchant, and consumer who is interested in how profits are really made.

How much money can I really make from stocks? Let's cut right to the chase: If you start early, save steadily, and invest intelligently, you can make a lot of money in the stock market. OK, but how much is it? See how much time the blue line spends above zero vs. below zero? Again, that tells us that the stock market has made money (had a positive gain) over nearly every 10 year period for the last 84 years. Finally, here's a crystal clear way to see the power of holding stocks for the long term: This chart from American Century Investments shows that if you had invested in the S&P 500 during any 10-year period from 1926-2017, you would've made money during 94% of those samples. Ever wondered how the big grains are traded? We speak with Elaine Kub, farmer, trader, and author of *Mastering the Grain Markets: How Profits Are Really Made*. We get a behind the scenes look at major grain trading and tons of tips for startups. You don't want to miss this: Finding the underlying idea behind major business moves Why you need to consider global warming in your food investments. Hint: California almonds, 2015 is a big year When to invest in land Stress management when making big bets Increase your success rates with local arbitrage How to get a rough, quantitative view of a spec

*Mastering the Grain Markets* author Elaine Kub talks with Todd Gleason about one of the major themes of the book: Arbitrage trading! <http://www.youtube.com/watch?v=pMQpH3qccDM&feature=youtu.be>.
