Preface The American Academy of Pediatrics (AAP) Red Book® Atlas of Pediatric Infectious Diseases, 4th Edition, is a summary of key disease information from the AAP Red Book®: 2018-2021 Report of the Committee on Infectious Diseases. It is intended to be a study guide for students, residents, and practicing physicians. The images of common and unusual features of children with infectious diseases can provide diagnostic clues not found in the print version of Red Book. The juxtaposition of these images against text summarizing the clinical manifestations, epidemiology, diagnostic methods, and treatment steps through diagnosis, evaluation and management essentials for each condition. Essential information on each condition is presented in the precise sequence needed in the clinical setting--clinical manifestations, etiology, epidemiology, incubation period, and treatment.
