## Description:

Kids begin their learning journey as curious problem solvers who ask questions and create solutions. As they go through school, something happens to many of our students, and they begin to play the game of school, eager to be compliant and follow a path instead of making their own.

As teachers, leaders, and parents, we have the opportunity to be the guide in our kids' education and unleash the creative potential of each and every student. In a world that is ever changing, our job is not to prepare students for something; instead, our role is to help students prepare themselves for anything.

In Empower, A.J. Juliani and John Spencer provide teachers, coaches, and administrators with a roadmap that will inspire innovation, authentic learning experiences, and practical ways to empower students to pursue their passions while in school.

Compliance is expecting students to pay attention. Engagement is getting students excited about our topics, interests, and curriculum. But when we empower students, they crave learning that is both meaningful and relevant to their life, now and in the future.

Empower is for you if ...

\* You are a teacher eager to get students making, designing, and creating their own learning path in (and out of) the classroom

\* You are a superintendent, district administrator, or principal who is leading change and working to help your staff thrive in a twenty-first-century learning environment

\* You are a coach, staff developer, or teacher leader who is crafting professional learning experiences and wants to encourage colleagues to be the guide on the ride  
Empower is focused not only on what happens when students own their learning but also on how to reach a place where that is possible in the midst of standards, set curriculum paths, and realities of school that we all have to deal with. Written by real educators who are still working in schools and with teachers, Empower will provide ways to overcome these challenges and turn them into opportunities for our learners to be unabashedly different and remarkable.

Invite students to create their own educational videos to post on YouTube. 9. Digital storytelling. If you haven't tried this one yet, give it a go. The topics used in digital storytelling range from personal tales to the recounting of historical events, from exploring life in one's own community to the search for life in other corners of the universe, and literally, everything in between. 10. Writing in the voice of a character. Emulating a character from a book or a film is a great way to try out different voices. 11. Help students find their passion. Urge students to remain aware of their own interests, passions, and ideas, and to try to identify themes and patterns when present. 38. Sharing triumphs and challenges. You can get to know yourself better by sharing your experiences with others. In Empower, the authors highlight certain aspects that empowered learners have: ownership of their work, due to choice in what they are learning and how they can present it. skills to pursue their passions, and the need to develop them further. the ability to build their own roadmaps, i.e., rather than following the path that is set by the teacher for all the students, they pursue their individual paths. It all boils down to autonomy or independence. Empower: What happens when student own their learning. IMPress, LP. Special thanks to Andrew Mills, Alicia Woody and Melissa White for their feedback. Students should not be answering our questions, but asking their own questions and then seeking the answers. If we want lifelong learners who are ready for anything the future has for them, we need to help students take the reins. This book shows us how to do that! As a huge fan of books and learning, I was SO excited for Empower! I knew it would be different, something that would offer new ideas. What I didn't anticipate was how much the stories and questions would touch my heart, as well as my mind. I took 5 days to finish a book that I could easily have read in a few hours. It is a fast read, but it provokes SO much reflection, introspection, and creative thinking that it demands more time or perhaps a second or third reading to fully digest it.

LAUNCH: Using Design Thinking to Boost Creativity and Bring Out the Maker in Every Student. John Spencer. 4.5 out of 5 stars 117. But when we empower students, they crave learning that is both meaningful and relevant to their life, now and in the future. Empower is for you if You are a teacher eager to get students making, designing, and creating their own learning path in (and out of) the classroom. Empower is focused not only on what happens when students own their learning but also on how to reach a place where that is possible in the midst of standards, set curriculum paths, and realities of school that we all have to deal with. Written by real educators who are still working in schools and with teachers, Empower will provide ways to overcome these challenges and turn them into opportunities for our learners to be unabashedly different and remarkable. Students need an environment where students are the center of their learning, helps them become independent learners and empowers them to make decisions on their own. This ultimately prepares them for "real world" skills such as critical thinking, problem-solving, and negotiation skills. Of course, as educators, it is important to act as facilitators or coaches and encourage better decision-making among the students. Another observation is that when students direct their own learning, they collaborate more, and this contributes towards developing their teamwork and communication skills. Our role as educators, mentors, parents, is to present them with ideas and opportunities and allow them to go beyond those thoughts.
